# Fruit and Beauty in a Small Space

**B**EAUTIFY your home with an "orchard" growing on vines! U.S. Espalier Fruit Trees grow in artistic vinelike patterns against any wall, trellis or fence. They yield an abundance of delicious fruit that is often larger and richer than fruit from regular trees. Developed in Switzerland where garden space is limited, these unique trees are now available in America and add a distinctive touch of beauty to any home or garden.

## ***Espalier Trees Provide Blossoms In Spring, Fruit In Autumn***

The variety of designs into which Espaliers can be trained is almost unlimited. T-shapes, U-shapes, palmettes, candelabra, horizontal and vertical cordons, pyramids and many other interesting designs can be worked out to fit any space in your yard. Trained around windows, planted against a fence or as a hedge, U. S. Espalier Fruit Trees add new beauty to your home with their gorgeous blossoms, abundant foliage and ripening fruit.

## ***Espalier Trees Need Minimum Space And Care***

An Espalier tree needs no more space or care than a rose bush. Genuine U. S. Espalier Fruit Trees are propagated from true dwarf roots and scions which limit their size and growth. They come from the nursery ready-trained, with complete instructions for planting and care.

## ***Genuine Dwarf Trees***

**D**WARF trees are grown from the same stock as our espaliered trees, and have most of their advantages. They require very little space—only one-fourth as much as an ordinary tree. Yet they yield an abundance of delicious fruit.

When fully grown, the maximum height of dwarf trees is not over 10 feet, and by proper pruning they can be kept down to six feet. This makes it easy to prune and spray them, and the fruit, which is of true variety, is within reach for easy picking.
